PREMIUM LINERLESS FLATBACK PAPER SPLICING TAPE

DESCRIPTION:

Is a premium blue flatback paper tape coated with a high-performance acrylic adhesive, engineered for demanding splicing and converting applications. Its linerless construction eliminates the need for a release liner, simplifying application and reducing handling and waste. The product provides high adhesion, strong adhesion to its own backing, good tensile strength, and excellent performance across a wide operating temperature range, making it particularly suitable for reliable paper and paperboard splicing operations.

SPECIALLY DESIGNED FOR:

Designed for flying splice and general splicing applications involving paper, paperboard and other paper-based materials. Typical uses include roll changes, paper and paperboard web splicing, tube and core manufacturing, and converting operations requiring a strong and reliable splice. Its linerless construction helps simplify splice preparation, reduce release-liner waste and improve operator efficiency, while the blue backing provides easy visual identification of the splice.
